

Todd Q3 2022 Intrinsic Value Opportunity Review

	3Q 2022	YTD	1 Year	3 Year*	5 Year*	7 Year*	10 Year*
IV Opportunity (Gross)	-1.3%	-15.5%	-2.2%	9.6%	8.0%	7.5%	9.7%
IV Opportunity (Net)	-1.5%	-16.0%	-3.0%	8.7%	7.1%	6.6%	8.8%
S&P 500	-4.9%	-23.9%	-15.5%	8.2%	9.2%	11.4%	11.7%
Russell 1000 Value	-5.6%	-17.8%	-11.4%	4.4%	5.3%	8.2%	9.2%

* Annualized Total Returns. Please refer to the attached Performance Disclosure for further information

Markets logged their third consecutive negative quarterly return as growth concerns intensified and peak inflation remained elusive. The IVO strategy beat both the S&P 500 and Russell 1000 Value in the quarter. Sector performance continues to have a different flavor in this bear market vs. years past as Discretionary, Energy and Financials outperformed this quarter.

Last quarter we spoke to the various headwinds that were weighing on markets, including tightening central bank policy, war and China's 'Zero-Covid' policy. It felt as though investors were searching for potential off-ramps from each of these policy stances. Well... the search continues. Inflation readings continue to run hot forcing central banks to double down on their rapid tightening campaign. The Russia/Ukraine War has escalated in recent weeks with phony referendums in Russian controlled territories and the destruction of critical infrastructure (i.e. the bridge to Crimea and the Nord Stream pipeline). Despite some easing of restrictions, Xi Jinping continues to defend China's 'Zero-Covid' policy as the 20th Party Congress solidified his third term. As if those weren't enough, we also saw tensions flare in Taiwan after a visit from the highest ranking US official (Speaker Pelosi) in 25 years, OPEC cut oil production in an act of defiance to the US and the UK bond market rioted following newly elected PM Liz Truss's fiscal package causing interest rates to explode higher. This all kept a bid under the US dollar, which is at multi-decade highs against several major currencies. Fortunately, markets are discounting mechanisms and are already pricing in a recession. We think the potential for things to get less chaotic remains as the Fed is rapidly approaching a peak (at least intermediately) in their policy rate, the UK is in the process of a policy U-turn to calm debt markets and stimulus/reopening in China remain underappreciated. Seasonally, markets typically act much better once we get through October. Forward returns have also been strong historically when markets are already off more than -25% and sentiment is extremely depressed. Additionally, the S&P has never posted a negative 12mo return following a mid-term election. A flawless track record dating back to the 1940's. Ebbing tail risks would certainly help bring these historical analogs into play. It may be difficult to find reasons to be constructive and uncertainty is very high, however much of this is the result of a new regime we've entered that is being defined by higher rates and inflation. Two years into this new regime has seen Value emerge as leadership at the expense of Growth. We've found it to be more useful at the portfolio level to focus on this trend which continues to become entrenched.

Factor performance

Our factor attribution showed a shift back to Growth with all of the Value metrics ranking at the bottom of the list. This was likely the result of the short rally the market saw through the middle of the quarter, which was led by higher Beta Growth names. Year-to-date the opposite is true as the factor work continues to show the leadership profile of Value and the underperformance of Growth metrics. As we mentioned in last quarter's commentary, the Lower Beta names have rotated and now complement all of the Value metrics we track while Growth names make up most of the High Beta subset. Volatility seems to be a function of market preference for the cycle and this cycle looks to clearly have shifted to favor Value. We are also happy to see our Multi-Factor Ranking working this year.

Performance Attribution

Attribution for the quarter showed that our outperformance was driven by both sector allocation and stock selection. Our top performing sectors were Energy, Health Care and Industrials. Energy and Industrials continue to trade relatively well. Within Health Care, our Managed Care and Health Care Services names drove returns. Consumer Discretionary and Communication Services were our worst performing sectors.

Our top five performers during the quarter were ON Semiconductor, ConocoPhillips, O'Reilly Automotive, Devon Energy, and HCA Healthcare. ON Semiconductor continues to see strong end market demand (particularly in auto and industrial) support pricing power. Inventories are lean and the company has a nice pipeline of design wins in autos. ConocoPhillips is benefitting from higher price realizations in oil and gas which has allowed them to increase shareholder returns in 2022 from \$10B to \$15B. O'Reilly shares rose following its analyst day where it noted it should gain market share from smaller competitors through pricing initiatives and after noting it sees strong opportunities for growth outside the US. Devon Energy benefited following its 2Q release when it sharply beat earnings expectations and raised full year production guidance, which should allow for meaningful return of capital to shareholders. HCA Healthcare Inc. shares were also aided following their 2Q release after their report highlighted a strong beat on earnings largely due to strong cost controls, notably with labor costs, which are expected to further ease in coming quarters.

Our five worst detractors from performance during the quarter were Hewlett Packard, Seagate Technology, Moderna, Charter Communications, and Alphabet. Hewlett Packard and Seagate Technology both experienced significant downward pressure, along with other hardware focused names, as demand began to weaken. This led to most names in the group to lower their outlooks when 2Q results were reported. Moderna Inc. shares suffered despite reporting 2Q results which showed a beat on the top and bottom lines as profits were sharply down year over year due to inventory charges related to unused vaccine doses and a loss on purchase commitments. Charter Communications Inc. shares also beat on the top and bottom lines when 2Q results were reported. However, its report highlighted a decline in net subscriber additions as government subsidy programs ended. Alphabet Inc. underperformed on fears their operating profit may be pressured in the near to medium term as YouTube revenue growth slows at the same time R&D spend and sales and marketing costs intensify as headcount ramps.

Summary

The profile of what works when the market sells off and investor anxiety gets priced in continues to be very different from the prior cycle. We've highlighted this in prior letters, but we think the market is sending a message that we're in a different regime that favors a different profile. That profile is one that is defined by less multiple risk, better pricing power and higher quality that benefits from higher rates and inflation. Said differently, the profile that is working is consistent with Value and is coming at the expense of higher multiple Growth names. At a time when uncertainty is running high we find it productive to listen to the messages being sent by the market and to focus on what is working. The more Value oriented profile we just walked through has been in favor for roughly 2 years and we think the environment is likely to continue to do so as inflationary pressures remain. This has benefitted our discipline and we welcome the changing leadership regime.

We are always available via email or phone and welcome your calls. If you have any questions, please feel free to contact any of us for further information.

TODD ASSET MANAGEMENT LLC INTRINSIC VALUE OPPORTUNITY COMPOSITE DISCLOSURE

Past performance does not provide any guarantee of future performance, and one should not rely on the composite or any security's performance as an indication of future performance. Investment return and principal value of an investment will fluctuate so that the value of the account may be worth more or less than the original invested cost. There is no guarantee that this investment strategy will work under all market conditions. Registration of an investment adviser does not imply any level of skill or training.

Specific stocks discussed in this presentation are included to help demonstrate the investment process or, as a review of the Composite's results; and are not intended as recommendations of said securities and carry no implications about past or future performance. All or some of the specific stocks mentioned may have been purchased or sold by accounts within the Composite during the period, or since the period, and may be purchased or sold in the future. A complete listing of the holdings as of the period end is available upon request. The compilation of information contained herein may reflect the views and opinions of TAM financial professionals at the time of creation which may change at any time without prior notification.

Todd Asset Management LLC ("TAM") is a registered investment adviser. The performance presented represents a composite of fully discretionary accounts invested in equity securities within the S&P 500 Index with the objective to seek capital appreciation. This goal is pursued by investing in a portfolio of securities that are in the least expensive third of the S&P 500 Index using a rules-based process based on financial strength, profitability strength and market acceptance.

Todd Asset Management LLC, formerly Todd-Veredus Asset Management LLC began operations on June 1, 1998 as Veredus Asset Management LLC (VAM). Effective May 1, 2009, VAM combined with Todd Investment Advisors, Inc. (TIA). TIA (and its predecessors) was founded in 1967 by Bosworth M. Todd. Upon the combination of VAM and TIA in 2009, Veredus Asset Management LLC changed its name to Todd-Veredus Asset Management LLC (TVAM). On February 28, 2013, after a change in ownership involving some VAM unitholders, TVAM changed its name to Todd Asset Management LLC. The firm continues to offer the same strategies managed by individuals using the process founded under TIA.

The Intrinsic Value Opportunity Composite contains fully discretionary, taxable and tax-exempt accounts that use either the S&P 500 Index or the Russell 1000 Value Index as the benchmark. All fee-paying, fully discretionary portfolios under our management are included in a composite. Accounts are eligible for inclusion in the composite at the beginning of the first calendar quarter after the month of initial funding and upon being fully invested.

TAM claims compliance with the Global Investment Performance Standards (GIPS®). The Firm has been independently verified for the periods January 1, 2008 through December 31, 2021. VAM was verified for the period July 1, 1989 through December 31, 2007 by a previous verifier. TIA's compliance with the GIPS® standards has been verified for the period January 1, 1993 through April 30, 2009. The Intrinsic Value Opportunity Composite has been examined for the periods January 1, 2011 through December 31, 2021. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. To receive additional information regarding TAM, including a GIPS Composite Report for the strategy presented, contact Monica Slyter at 1-888-544-8633, or write Todd Asset Management LLC, 101 South Fifth Street, Suite 3100, Louisville, Kentucky 40202, or mslyter@toddasset.com.

The performance information is presented on a trade date basis, both gross and net of management fees, net of transactions costs, and includes the reinvestment of all income. Net of fee performance was calculated using the applicable annual management fee schedule of .80% applied monthly. From October 2009 to March 2014 the management fee schedule applied to the composite was 0.70%. Prior to October 2009, the management fee schedule applied to the composite was 0.60%. Actual investment advisory fees incurred by clients may vary. The currency used to calculate and express performance is U.S. dollars. All cash reserves and equivalents have been included in the performance.

The composite performance has been compared to the following benchmarks. The indexes are unmanaged, and not available for direct investment; they include reinvestment of dividends; they do not reflect management fees or transaction costs. The volatility of the index and a client account will not be the same. **S&P 500 Index** is a widely recognized index of market activity based on the aggregate performance of a selected portfolio of publicly traded common stocks. The performance data was supplied by Standard & Poor's. It is included to indicate the effect of general market conditions. **Russell 1000 Value Index** is a widely recognized index of market activity based on the aggregate performance of common stocks from the Russell 1000 Index, with lower price-to-book ratios and lower forecasted growth values. The performance data was supplied by Frank Russell Trust Company.
